REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art includes methods and apparatus for recovering coalbed methane such as taught by Steeman (U.S. Patent number 4,245,699). The prior art also includes mining or tunneling processes and apparatus which include drainage of methane such as taught by Thakur (U.S. Patent number 4,303,274) or Richards (U.S. Patent number 4,452,489). Smith, et al. (U.S. Patent number 4,265,737) teaches a process including tunneling along a coal seam and producing methane from slurry outside of the mine. Ingle, et al. (U.S. Patent number 6,591,903) teaches separation of methane from water underground. The prior art of record fails to disclose or fairly suggest the process including tunneling below the water table, separating a portion of the water while below the water table, reducing the pressure on the separated water, removing methane, and discharging separated water as called for in claim 1. Drake, et al. (U.S. Patent number 6,554,368) teaches a system with a tunneling machine in combination with a separator adapted for separating oil from oil sands. The prior art of record also fails to disclose or suggest the system including a tunneling machine in combination with a separator adapted for separating a portion of the water, extracting dissolved methane, and conduits for removing methane and discharging water as called for in claim 9.

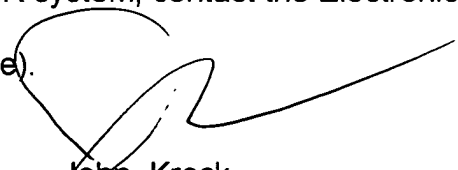

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
